

Examples of laws of conservation

Related video: *01 – Introduction to Laws of Conservation*

In the video, several examples of quantities that are following a law of conservation were given:

Everyday life:

- The number of cars in a parking lot
- The amount of water in a drinking glass
- The amount of money in a bank account/wallet

Science:

- Mass
- Charge
- Energy/Enthalpy
- Momentum (Linear/Angular)
